Re: Meadow Canyon Dam

Gentlemen:

Plans and specifications for the subject project have been reviewed and approved by this office subject to the following conditions:

1. That this office be supplied with the names and qualifications of the inspectors for the project prior to the start of construction.
2. That this office be supplied with copies of the daily inspection reports. These are to be submitted weekly.
3. That this office be supplied with the results of all material tests performed during the construction period. The results of these tests should be submitted with the weekly inspection reports.
4. That this office be notified of the contractor and his estimated starting and completion dates. The name of the contractor's representative shall also be supplied.
5. That this office be notified of any changes in the construction practices or materials to be used that are not represented by the construction documents on file. Any major changes must be approved in writing prior to their use or construction.
6. That this office be notified when the foundation is prepared so that it can be inspected prior to placement of any fill material.
7. That this office be notified and involved in a final inspection of the constructed project that involves all interested parties. It should be understood that storage is not allowed until approval of the completed project is given.

Barrick Mercur Gold Mines, Inc.

8. That this office be supplied with a final set of mylars that represent the "as-constructed" project.
9. The original title sheet should be submitted to this office for signature, following signature by the owner & design engineer.

If you have any questions concerning the approval of the project, please feel free to contact me or Richard Hall of my staff.

Sincerely,

Earl M. Staker
